

Rigaku Features Latest Analytical Instrumentation at 58th Eastern Analytical Symposium

Rigaku is presenting its XRD and XRF technology for qualitative and quantitative analysis at the 2019 Eastern Analytical Symposium (EAS)

November 18, 2019 – Princeton, NJ. [Rigaku Corporation](#) is presenting its wide range of X-ray analytical instrumentation at the *58th Annual Eastern Analytical Symposium and Exhibition (EAS)*.

The event is taking place Monday, November 18 through Wednesday, November 20, 2019 at the [Crowne Plaza Princeton – Conference Center](#) in Plainsboro, NJ. Rigaku is presenting its latest benchtop X-ray diffraction ([XRD](#)), X-ray fluorescence ([XRF](#)) and [Raman](#) spectroscopy instrumentation at booth M1.

EAS is held each year to showcase the latest instrumentation and services for analytical scientists and provide professionals and students continuing education in analytical sciences. The theme for the three-day event is “Enhancing Analytical Chemistry with Sustainable Solutions.” An exhibition and technical program, along with professional development workshops will be featured, highlighting the latest innovations in analytical chemistry.

Rigaku manufactures a complete line of X-ray analytical instrumentation and components for research, testing, industrial process control, and product development. Systems include the Rigaku [MiniFlex](#) XRD and [Supermini200](#) wavelength dispersive X-ray fluorescence (WDXRF) benchtop systems, and the Rigaku [SmartLab](#) multi-purpose diffractometer with small angle X-ray scattering ([SAXS](#)) and in-plane capabilities.

The Rigaku [Progeny](#) 1064nm-based handheld Raman analyzer will be available for in-booth demonstrations. The unit is designed for flexibility and ease-of-use, to meet the needs of routine manufacturing and more intricate quality assurance applications.

More information about analytical chemistry solutions from Rigaku is available at [www.rigaku.com/applications/qualitative quantitative analysis](http://www.rigaku.com/applications/qualitative_quantitative_analysis)

About Rigaku

Since its inception in Japan in 1951, Rigaku has been at the forefront of analytical and industrial instrumentation technology. Rigaku and its subsidiaries form a global group focused on general-purpose analytical instrumentation and the life sciences. With hundreds of major innovations to their credit, Rigaku companies are world leaders in X-ray spectrometry, diffraction, and optics, as well as small molecule and protein crystallography and semiconductor metrology. Today, Rigaku employs over 1,400 people in the manufacturing and support of its analytical equipment, which is used in more than 90 countries around the world supporting research, development, and quality assurance activities. Throughout the world, Rigaku continuously promotes partnerships, dialog, and innovation within the global scientific and industrial communities.
